

1,200 Unlisted Words & 300 Odd-One-Out Puzzles

— Book 5 —

Here are the unlisted words to Book 5 of *The World's Largest Collection Of Themed Word Search Puzzles* published by Charles Waterford. There are a total of five books in this collection.

The words are grouped together in groups of four. Your job is to figure out which word does not belong with the other three. In other words, which one is the odd-one-out?

Dotted lines divide the puzzles from the hints and solutions. You can fold the paper along these lines to hide the hints and solutions while you take a guess.

By the way, you'll likely find that many of these puzzles are too easy for you. Some might even be too hard. But hopefully a few are just right. Note that alternative solutions and/or explanations to the ones given here are possible.

Thank you for purchasing our book and happy solving!
